

NEXT STEPs

Advancing Nursing Home Care Through Research

MISSION STATEMENT

NEXT STEPs is building a network of researchers, nursing homes, and other partners to improve evidence-based care through collaborative clinical trials research.

PURPOSE

To establish a national consortium of interdisciplinary aging researchers that will develop the infrastructure to conduct clinical trials in nursing homes

To address critical knowledge gaps and generate high-quality evidence to inform medical decision making

To create centralized research infrastructure (overall coordination, recruitment, training, data management and resources, methods and measures, communication and dissemination)

We support high-quality research by advising on research design, sharing best practices, and sharing findings with those who can use them to improve the lives of nursing home residents, their families, and staff.

September 2024 issue (Volume 72, Issue 9)

WAYS TO GET INVOLVED

1. Sign up for updates
2. Experiential Learning Program
3. Pilot Funding
4. Research Studios
5. Annual Meeting
6. Multiple opportunities to provide input into tools and materials to be developed, including calls for partner workgroups
7. Resources to use to support your work
